Edition 1 and nat. amdt 1

**IEC 60660:1999**

Edition 2

Any reference to SABS IEC 60660 is deemed  
to be a reference to this standard  
(Government Notice No. 1373 of 8 November 2002)

## **SOUTH AFRICAN NATIONAL STANDARD**

# **Insulators — Tests on indoor post insulators of organic material for systems with nominal voltages greater than 1 000 V up to but not including 300 kV**

This national standard is the identical implementation of IEC 60660:1999, and is adopted with the permission of the International Electrotechnical Commission.

#### Table of changes

Change No.	Date	Scope
Nat. amdt 1	2007	Amended to change the designation from SABS to SANS, with no technical changes.

#### National foreword

This South African standard was approved by National Committee SABS/TC 067/SC 04, *Electricity distribution systems and components – Insulators*, in accordance with procedures of the SABS Standards Division, in compliance with annex 3 of the WTO/TBT agreement.

This SANS document was published in June 2007.

This SANS document supersedes SABS IEC 60660:1999 (edition 1).

**Compliance with this document cannot confer immunity from legal obligations.**

**Reaffirmed and reprinted in March 2017.  
This document will be reviewed every five years  
and be reaffirmed, amended, revised or withdrawn.**

**INSULATORS – TESTS ON INDOOR POST INSULATORS OF  
ORGANIC MATERIAL FOR SYSTEMS WITH NOMINAL  
VOLTAGES GREATER THAN 1 000 V UP TO BUT  
NOT INCLUDING 300 kV**

**FOREWORD**

- 1) The IEC (International Electrotechnical Commission) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of the IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, the IEC publishes International Standards. Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. The IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of the IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested National Committees.
- 3) The documents produced have the form of recommendations for international use and are published in the form of standards, technical specifications, technical reports or guides and they are accepted by the National Committees in that sense.
- 4) In order to promote international unification, IEC National Committees undertake to apply IEC International Standards transparently to the maximum extent possible in their national and regional standards. Any divergence between the IEC Standard and the corresponding national or regional standard shall be clearly indicated in the latter.
- 5) The IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with one of its standards.
- 6) Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. The IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60660 has been prepared by subcommittee 36C: Insulators for substations, of IEC technical committee 36: Insulators.

This second edition cancels and replaces the first edition published in 1979 and constitutes a technical revision.

The text of this standard is based on the following documents:

FDIS	Report on voting
36C/111/FDIS	36C/114/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 3.

Annex A is for information only.
