Abstract

Specifies criteria for the segregation, collection, movement, storage and disposal of waste materials within health care.

Keywords

chemicals, cytotoxicity tests, disposal, handling, hazardous substances, hospitals, incinerators, labels, recycling, waste disposal, waste handling.

Foreword

This South African standard was approved by National Committee StanSA SC 5140.06M, *National committee for dangerous goods standards – Disposal of clinical waste*, in accordance with procedures of Standards South Africa, in compliance with annex 3 of the WTO/TBT agreement.

This edition cancels and replaces the first revision (SABS 0248:1993).

Owing to the fact that information in respect of names and addresses of competent authorities and certification authorities dealing with dangerous goods is subject to change, details of the competent authorities and certification authorities are given in a general advice sheet provided with this standard. This advice sheet will be updated every six months and it is the responsibility of the competent authority/certification authority to notify Standards South Africa of any changes. The advice sheet will be available, free of charge, from the Standards Sales Department of Standards South Africa.

Annex A is for information only.

Introduction

This standard presents the basic elements of the management of healthcare waste. In this respect certain issues are considered to be of importance for successful application of this standard, namely

- a) the need to deal with the management aspects of healthcare waste in addition to the technical operation of healthcare waste disposal,
- b) the need for a document suitable for audit purposes that can be administered over a broad range of healthcare facilities which may have greatly varying resources,
- c) the need to control the potential for the spread of infectious diseases that can place the public and especially waste disposal workers at risk, and
- d) the need for guidelines covering the entire cycle, including waste minimization, point of use disposal through internal and external transport to final treatment and disposal.

Abstract	
Keywords	
Foreword	
Introduction	
1 Scope	5
2 Normative references	5
3 Definitions and abbreviations	6
3.1 Definitions	6
3.2 Abbreviations	11
4 Identification of healthcare waste	11
4.1 General	11
4.2 Classification	12
4.2.1 Hazard classes	12
4.2.2 Hazard rating	13
4.3 Waste categories, colour coding and marking of packaging	14
4.4 Hazard label for cytotoxic waste	15
4.5 Hazard labelling for transport	15
5 Responsibilities	20
5.1 General management	20
5.2 Waste management team	20
5.2.1 General	20
5.2.2 Occupation health and safety officer	21
5.2.3 Heads of departments	21
5.2.4 Senior nursing officer	22
5.2.5 Infection control officer	22
5.2.6 Chief pharmacist	22
5.2.7 Radiation officer	22
5.2.8 Maintenance engineer	22
5.2.9 Waste management officer	22
5.3 The waste management plan	23
5.3.1 General	23
5.3.2 Contractual commitments	24
5.3.3 Documentation and data control	24
5.3.4 Waste management procedures	25
5.3.5 Inspection and quality control	25
5.3.6 Health, safety and environmental policy	26
5.3.7 Work procedures	26
5.4 Training, supervision and workplace hygiene	26

Contents *(continued)*

	Page
6 Waste storage	28
6.1 Temporary healthcare waste store	28
6.2 Central healthcare waste store	28
6.3 Provisions for the storage of designated waste categories	29
6.3.1 Infectious waste	29
6.3.2 Chemical and pharmaceutical waste	29
6.3.3 Radioactive waste	30
6.3.4 General waste	30
7 Waste minimization, segregation and packaging	31
7.1 Waste minimization	31
7.2 Waste segregation	31
7.3 Packaging for healthcare waste	31
7.3.1 General	31
7.3.2 Packaging for infectious waste (excluding sharps)	31
7.3.3 Packaging for sharps	32
7.3.4 Packaging for chemical waste	32
7.3.4.1 General	32
7.3.4.2 Packaging for waste aerosol dispensers and gas cylinders of class 2	32
7.3.4.3 Packaging for waste flammable liquids of class 3	33
7.3.4.4 Packaging for waste oxidizing substances and organic peroxides of class 5	33
7.3.4.5 Packaging for waste toxic substances of class 6, division 6.1	33
7.3.4.6 Packaging for pharmaceutical waste, including cytotoxic or genotoxic waste	33
7.3.4.7 Packaging for radioactive waste of class 7	34
7.3.4.8 Packaging for corrosive waste of class 8	35
7.3.5 Packaging for general healthcare waste	35
8 Collection and transport of healthcare waste	35
8.1 Collection of waste within the healthcare facility	35
8.2 Transport of waste within a healthcare facility	36
8.3 Collection of hazardous healthcare waste for off-site transport	36
8.3.1 General	36
8.3.2 Contractual requirements	37
8.4 Off-site transport of hazardous healthcare waste	38
9 Spillage of hazardous healthcare waste	38
9.1 Policy and strategies	38
9.2 Procedures for spillage cleanup	38
9.2.1 Infectious and hazardous chemical waste spills	38
9.2.2 Cytotoxic pharmaceutical spills	39

10 Treatment and disposal methods	39
10.1 General	39
10.2 Disposal via discharge to a municipal sewer	40
10.3 Disposal of healthcare waste by incineration or alternative technologies	40
10.3.1 Incineration	40
10.3.2 Alternative technologies to incineration	41
10.3.3 Incinerators or alternative treatment facilities operated on-site at healthcare facilities	41
10.3.4 Incinerators or alternative treatment and disposal facilities operated off-site from healthcare facilities	42
11 Disposal by small-scale healthcare waste generators	42
11.1 General	42
11.2 Waste categorization and segregation	43
11.3 Disposal of healthcare waste generated in private dwellings	43
Annex A (normative) Minimal programmes for healthcare waste management	44
A.1 Introduction	44
A.2 Basic principles	44
A.3 Healthcare waste categories	47
A.3.1 General	47
A.3.2 Hazardous healthcare waste	47
A.3.3 Highly hazardous healthcare waste	47
A.4 Segregation and packaging	47
A.5 Safe handling and storage	48
A.6 Minimization and safe recycling of healthcare waste	49
A.6.1 Chemicals and pharmaceuticals	49
A.6.2 Aerosol dispensers and gas cylinders	49
A.6.3 Mercury	49
A.6.4 Recyclable sharps	50
A.7 Treatment and disposal of hazardous healthcare waste	50
A.7.1 General	50
A.7.2 Thermal processes	50
A.7.2.1 Static-grate single-chamber incineration	50
A.7.2.2 Drum or brick incinerators	51
A.7.2.3 Open-air burning	51
