SABS 1650

Ed. 1.1

Notice

This standard was approved in accordance with SABS procedures on 9 October 1995.

NOTE 1 In terms of the Standards Act, 1993 (Act 29 of 1993), no person shall claim or declare that he or any other person complied with an SABS standard unless

- a) such claim or declaration is true and accurate in all material respects, and
- b) the identity of the person on whose authority such claim or declaration is made, is clear.

NOTE 2 It is recommended that authorities who wish to incorporate any part of this standard into any legislation in the manner intended by section 31 of the Act consult the SABS regarding the implications.

This standard will be revised when necessary in order to keep abreast of progress. Comment will be welcome and will be considered when the standard is revised.

Foreword

A vertical line in the margin shows where the text has been modified by technical corrigendum No. 1.

Annexes A, B and C form an integral part of this standard.

Introduction

The attention of both users and manufacturers of liquid fuel dispensers covered by this standard is drawn to the requirements of the Trade Metrology Act, 1973 (Act 77 of 1973), and the fact that it is incumbent upon them to comply with this Act when liquid fuel dispensers are sold or used for trade purposes. Any SA approval number issued in terms of the Act shall not be considered as approval to apply the SABS mark nor shall it be construed to imply that the SABS mark is applicable. The administration of the Act is the responsibility of the Division of Trade Metrology of the South African Bureau of Standards.

Attention is drawn to the normative reference given in clause 2 of this standard. This reference is indispensable for the application of this standard.
