Notice

This standard was approved in accordance with SABS procedures on 24 August 1977.

NOTE 1 In terms of the Standards Act, 1993 (Act 29 of 1993), no person shall claim or declare that he or any other person complied with an SABS standard unless

- a) such claim or declaration is true and accurate in all material respects, and
- b) the identity of the person on whose authority such claim or declaration is made, is clear.

NOTE 2 It is recommended that authorities who wish to incorporate any part of this standard into any legislation in the manner intended by section 31 of the Act consult the SABS regarding the implications.

This standard will be revised when necessary in order to keep abreast of progress. Comment will be welcome and will be considered when the standard is revised.

Preface

The Metrication Committee of the Footwear Industry appointed a select committee (known as the 'Implementation Committee') to introduce the Mondopoint shoe sizing system into South Africa as smoothly as possible. The composition of this committee is given on page 4.

The standard incorporates all ISO requirements and tables with suggested width intervals for use in South Africa are given in Appendix B and are intended to serve as a guide for the South African Footwear Industry.

The method of calculating the Mondopoint length of lasts is based on formulae developed by the Shoe and Allied Trades' Research Association. The committee considered these to be the best available at the time. (See also Appendix A.)
