NOTICE

This specification was approved by the Council of the South African Bureau of Standards on 19 August 1981.

Manufacturers producing waterless hand cleaners to this specification may by arrangement with the Council of the South African Bureau of Standards apply the Council's standardization mark as illustrated above to their product as evidence to the consumer that the product is being made in accordance with this specification and that compliance with its requirements is ensured by tests and inspections carried out by the South African Bureau of Standards.

This specification will be reviewed when necessary in order to keep abreast of progress. Comment will be welcomed and will be considered when the specification is revised.
