Table of changes

Change No.	Date	Scope
Amdt 1	2017	Amended to add gas burners to the scope, to update normative references, to update safety requirements for gas water heaters, to revise materials requirements for water container shell, to update requirements for casing (outer cover) and cistern, to update requirements for pipe connectors, to update requirements for immersion heaters and thermostats, to update requirements for standing loss, to update requirements for mechanical strength test of water container, to update a note and requirements for standing loss test (standard, solar without associated solar collector, and heat pump water heaters), to update requirements for test for cathodic protection, to update requirements for tests of polyethylene lined steel storage containers on materials, construction methods and tests for hot water storage containers.

Foreword

This South African standard was prepared by National Committee SABS/TC 075, *Performance of household and similar electrical appliances*, in accordance with procedures of the SABS, in compliance with annex 3 of the WTO/TBT agreement.

This document was approved for publication in March 2017.

This document supersedes SANS 151:2015 (edition 8).

A vertical line in the margin shows where the text has been technically modified by amendment No. 1.

Compliance with this document cannot confer immunity from legal obligations.

This document is referenced in the *Compulsory specification for hot water storage tanks for domestic use*, as published by Government Notice No. 362 (Government Gazette No. 37631 of 16 May 2014 and in the Regulations of the Occupational Health and Safety Act, 1993 (Act No. 85 of 1993).

Annexes A, B, D and E form an integral part of this document. Annexes C and F are for information only.

Contents

	Page
Foreword	
1 Scope	3
2 Normative references	3
3 Definitions and abbreviations	6
4 General requirements	9
4.1 Type	9
4.2 Working pressure for closed (unvented) water heaters	9
4.3 Assembly of water heaters	9
4.4 Design	9
4.5 Safety requirements	9
4.6 Requirements for stored water	10
5 Constructional requirements	10
5.1 General	10
5.2 Material requirements for water container shell	10
5.3 Casing (outer cover) and cistern (where fitted)	12
5.4 Overflow and expansion pipes (cistern type water heater).....	13
5.5 Mounting of heating units and thermostats (where applicable)	13
5.6 Thermal insulating material	14
5.7 Pipe connectors	14
5.8 Minimum supply flow rate for cistern type water heaters	15
5.9 Water drain	15
5.10 Electrical connections	16
5.11 Immersion heaters and thermostats (where provision is made for the fitment thereof).....	17
6 Performance requirements	17
6.1 Quality and strength of pipe connectors and their attachment to water containers	17
6.2 Mechanical strength of complete water heaters	17
6.3 Mechanical strength of water containers	18
6.4 Metallic materials of components attached to or removable from the water container and in direct contact with water.....	18
6.5 Rated capacity of water containers	18
6.6 Standing loss	19
6.7 Hot water output (standard, solar and heat pump water heaters)	20
6.8 Reheating time (where provision is made for heating elements)	20

SANS 151:2017

Edition 8.1

Contents *(concluded)*

	Page
7 Inspection and methods of test	20
7.1 Inspection	20
7.2 Test conditions	20
7.3 Capacity test and mechanical strength tests	21
7.4 Efficiency tests	25
7.5 Test for dezincification resistance	27
7.6 Ageing test for plastic components subjected to direct sunlight	27
7.7 Test for emptying of the water storage heater	28
7.8 Test for cathodic protection.....	28
8 Marking and instructions	29
8.1 Marking	29
8.2 Operating and installation instructions	30
Annex A (normative) Notes to purchasers	33
Annex B (normative) Materials, construction methods and tests for hot water storage containers	33
Annex C (informative) Test procedure for sacrificial anodes	52
Annex D (normative) Requirements and tests for rotating seals of pipe connectors	54
Annex E (normative) Energy labelling of storage water heaters	55
Annex F (informative) Quality verification of fixed electric storage water heaters.....	57

Fixed electric storage water heaters

1 Scope

1.1 This standard specifies the characteristics of thermostatically controlled fixed electric storage water heaters intended for indoor and outdoor domestic use and for operation on a.c. supplies at voltages not exceeding 250 V for single-phase and 480 V for other appliances.

1.2 This standard is applicable to fixed electric storage water heaters used in conjunction with collectors for solar water heating.

1.3 This standard is applicable to fixed electric storage water heaters that are used in conjunction with a heat pump; and the heat pump and container comprise one integral unit.

1.4 This standard is also applicable to non-electric storage water heaters that may be coupled to heat pumps, solar collectors or gas burners. **Amdt 1**

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
