Acknowledgement

The South African Bureau of Standards wishes to acknowledge the valuable assistance of the Southern Africa Stainless Steel Development Association (SASSDA) in the preparation of this part of SABS 0162.

Notice

This part of SABS 0162 was approved by the President of the South African Bureau of Standards on 7 July 1997.

NOTES

1 In terms of the Standards Act, 1993 (Act 29 of 1993), no person shall claim or declare that he or any other person complied with an SABS standard unless

- a) such claim or declaration is true and accurate in all material respects, and
- b) the identity of the person on whose authority such claim or declaration is made, is clear.

2 It is recommended that authorities who wish to incorporate any part of this standard into any legislation in the manner intended by section 31 of the Act consult the SABS regarding the implications.

This part of SABS 0162 will be revised when necessary in order to keep abreast of progress. Comment will be welcome and will be considered when this part of SABS 0162 is revised.

Foreword

Annex A forms an integral part of this part of SABS 0162. Annexes B and C are for information only.

Notice	ii
Foreword	ii
Committee	vi
1 Scope	1
2 Normative references	1
3 Definitions, symbols and units	2
3.1 Definitions	2
3.2 Symbols	4
3.3 Units	11
4 Materials	12
4.1 Reference standards	12
4.2 Other steels	12
4.3 Mechanical properties	13
5 General design considerations	13
5.1 General	13
5.2 Loads and limit-states criterion	13
5.2.1 Loads	13
5.2.2 Limit-states	13
5.3 Cold work of forming	13
5.3.1 Application	13
5.3.2 Fully effective elements	14
5.3.3 Elements not fully effective	15
5.4 Maximum slenderness ratio for members in compression	15
5.5 Maximum flat width ratios for elements in compression	15
5.6 Maximum section depths	15
5.7 Properties of sections	16
5.7.1 General	16
5.7.2 Effective design width of elements in compression	16
5.7.3 Shear lag effects	26
5.7.4 Curling of flanges	27
