**Table of changes**

<b>Change No.</b>	<b>Date</b>	<b>Scope</b>
Nat. amdt 1	2002	Amended to change the standard to a mark <sup>a</sup> specification.
Nat. amdt 2	2007	Amended to change the designation from SABS to SANS, with no technical changes.

<sup>a</sup> In the current edition, the certification mark has been removed.

**National foreword**

This South African standard was approved by National Committee SABS SC 64C, *Lighting and optics – Luminaires*, in accordance with procedures of the SABS Standards Division, in compliance with annex 3 of the WTO/TBT agreement.

**This SANS document is referenced in the *Compulsory specification for electrical and electronic apparatus*, as published by Government Notice No. R. 89 (Government Gazette No. 31844) of 6 February 2009.**

This SANS document was published in May 2007.

This SANS document supersedes SABS IEC 60598-2-4:1997 (first edition).

**Reaffirmed and reprinted in June 2013.  
This document will be reviewed every five years  
and be reaffirmed, amended, revised or withdrawn.**

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

### LUMINAIRES –

#### Part 2: Particular requirements – Section 4: Portable general purpose luminaires

#### FOREWORD

- 1) The IEC (International Electrotechnical Commission) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of the IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, the IEC publishes International Standards. Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. The IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of the IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested National Committees.
- 3) The documents produced have the form of recommendations for international use and are published in the form of standards, technical reports or guides and they are accepted by the National Committees in that sense.
- 4) In order to promote international unification, IEC National Committees undertake to apply IEC International Standards transparently to the maximum extent possible in their national and regional standards. Any divergence between the IEC Standard and the corresponding national or regional standard shall be clearly indicated in the latter.
- 5) The IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with one of its standards.
- 6) Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. The IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60598-2-4 has been prepared by subcommittee 34D: Luminaires, of IEC technical committee 34: Lamps and related equipment.

This second edition cancels and replaces the first edition published in 1979 and amendment 3, published in 1990, and constitutes a technical revision.

The text of this standard is based on the first edition, amendment 3 and the following documents:

FDIS	Report on voting
34D/433/FDIS	34D/452/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication shall be read in conjunction with IEC 60598-1: *Luminaires – Part 1: General requirements and tests*.
