## **Introduction**

The requirements in this document are supplementary to and do not replace any of the requirements of relevant Acts (see foreword) or supporting Regulations of the provincial licensing authorities (PLA) in South Africa.

The intention of this document is to place sufficient controls on software and operations to ensure that wagering is

- a) fair,
- b) safe,
- c) secure,
- d) reliable, and
- e) auditable.

It is not the intention of this document to unreasonably

- mandate a single solution or method of realizing an objective,
- limit technology application of software,
- limit creativity and variety of choice,
- limit marketability, or
- advantage any supplier or manufacturer of software.

NOTE Alternative implementations of the requirements contained in this document will be considered on a case-by-case basis by the provincial licensing authority (PLA).

Situations or considerations that arise from evaluation of systems that have not been addressed in this document (for example, owing to omissions or to the use of new technology) will be resolved at the sole discretion of the PLA as part of the approval process.
