## CONTENTS

FOREWORD .....	5
INTRODUCTION .....	9
1 Scope .....	11
2 Normative references .....	11
3 Definitions .....	17
4 Requirements for the entire system .....	39
4.1 Normal function .....	39
4.2 Damage to persons or material .....	39
4.3 EE connected to unearthed supply mains under earth fault conditions .....	41
4.4 Earthing requirements .....	41
4.5 Wires and cables for interconnection .....	41
4.6 Fuses in neutral and protective conductors .....	43
5 Safety requirements .....	43
5.1 General requirements .....	43
5.2 Requirements for EE with regard to protection against electric shock .....	47
5.3 Requirements for EEs in installations with regard to protection against electric shock .....	119
6 Environmental requirements and conditions .....	125
6.1 Climatic conditions .....	125
6.2 Mechanical requirements (General) .....	131
6.3 Electrical and electromagnetic requirements .....	133
7 Requirements for electronic equipment .....	139
7.1 Design and construction .....	139
7.2 Marking, identification, documentation .....	147
8 Requirements for the assembly of EE(s) .....	153
8.1 General .....	153
8.2 Fitting tolerances after assembly .....	153
8.3 Supply mains .....	153
9 Testing .....	159
9.1 General .....	159
9.2 Compliance with this standard .....	165
9.3 Overview of tests .....	165
9.4 Performance of the tests .....	169
Annex A (informative) Additional information .....	203
Bibliography .....	287

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

---

### ELECTRONIC EQUIPMENT FOR USE IN POWER INSTALLATIONS

#### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62103 has been prepared by IEC technical committee 22: Power electronic systems and equipment.

The text of this standard is based on the European Standard EN 50178, prepared by the CENELEC Task Force BTTF 60-1: Assembly of electronic equipment.

It was submitted to the National Committees for voting under the Fast Track Procedure as the following documents:

FDIS	Report on voting
22/91/FDIS	22/92/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has not been drafted in full accordance with the ISO/IEC Directives, Part 2.
