SANS 60598-2-2:2013

Edition 2

IEC 60598-2-2:2011

Edition 3

SOUTH AFRICAN NATIONAL STANDARD

Luminaires

Part 2-2: Particular requirements – Recessed luminaires

This national standard is the identical implementation of IEC 60598-2-2:2011, and is adopted with the permission of the International Electrotechnical Commission.

National foreword

This South African standard was approved by National Committee SABS/TC SC 064-02, *Lighting and optics – Luminaires*, in accordance with procedures of the SABS Standards Division, in compliance with annex 3 of the WTO/TBT agreement.

This SANS document was published in September 2013.

This SANS document supersedes SANS 60598-2-2:1997 (edition 1, incorporating IEC amdt 1:1997, as modified by nat. amdt 1:2002 and nat. amdt 2:2006).

This SANS document is referenced in the National Regulator for Compulsory Specifications Act, 2008 (Act No. 5 of 2008).

FOREWORD.....	3
2.1 Scope.....	5
2.2 Normative references	5
2.3 General test requirements	5
2.4 Definitions	5
2.5 Classification of luminaires.....	5
2.6 Marking	5
2.7 Construction.....	5
2.8 Creepage distances and clearances	5
2.9 Provision for earthing	6
2.10 Terminals	6
2.11 External and internal wiring	6
2.12 Protection against electric shock	6
2.13 Endurance tests and thermal tests	6
2.14 Resistance to dust and moisture.....	7
2.15 Insulation resistance and electric strength.....	7
2.16 Resistance to heat, fire and tracking	7
Annex A (informative) Measurement of ambient temperature in an installation	8
Table 1 – Operating temperature of cable	7

INTERNATIONAL ELECTROTECHNICAL COMMISSION

LUMINAIRES –

Part 2-2: Particular requirements – Recessed luminaires

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60598-2-2 has been prepared by subcommittee 34D: Luminaires, of IEC technical committee 34: Lamps and related equipment.

This third edition cancels and replaces the second edition published in 1996 and its Amendment 1 (1997), of which is constitutes a technical revision. The changes introduced by this new edition are those required to maintain consistency later versions of IEC 60598-1 that have been published since the previous edition of this standard.

The text of this standard is based on the following documents:

FDIS	Report on voting
34D/1030/FDIS	34D/1038/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.
